

# NetSuite for the Contract Furniture Industry

# Knoll Connector

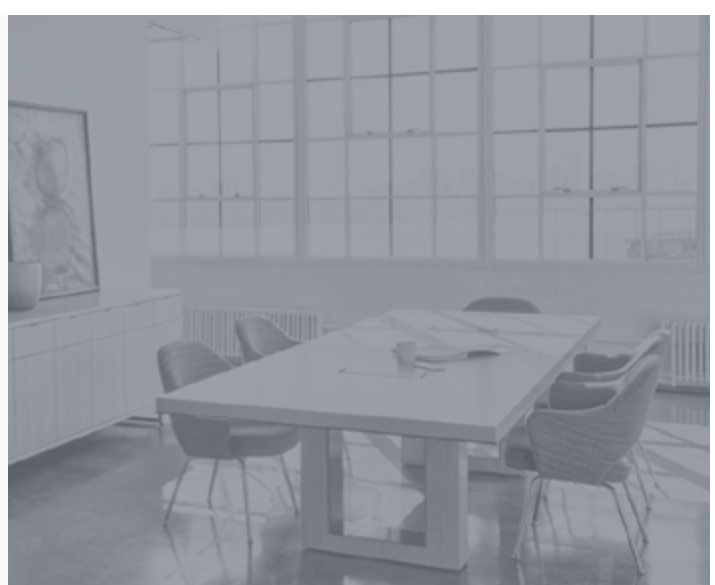

## Overview

CFI Suite Knoll Connector allows Knoll dealers the ability to receive XML uploads of Purchase Orders while taking full advantage of the acknowledgment synchronization in real-time.

Knoll Dealers like you can now have the assurance, with CFI Suite Knoll Connector, to synchronize your business system with the manufacturer for seamless and streamlined operations.

## Main Features

- ↑ Purchase Order Export
- ↑ Acknowledgment Sync
- ↑ Reporting

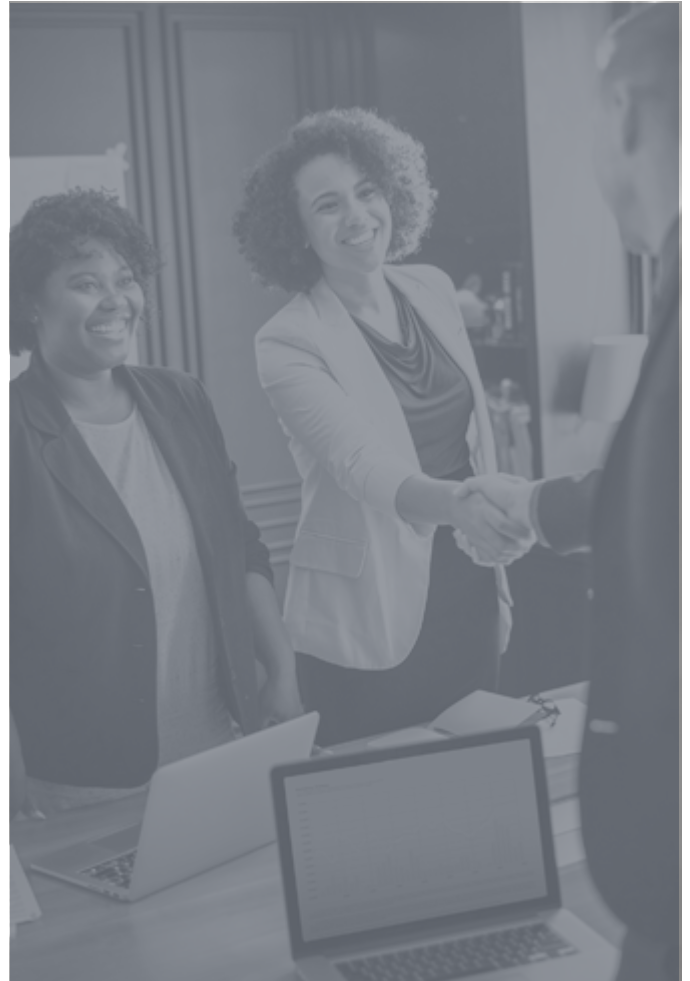

## Efficiency Through Automation

With CFI Suite Knoll Connector, the automation capabilities will ensure you have real-time acknowledgments available in your business system at any point in time through the right business intelligence and reporting tools.

### No more sticky notes

With the Reminder Portlet, CFI Suite will automatically showcase transactions missing acknowledgments, compared to those submitted and processed. The reporting capability will not only provide you with the accurate visibility, but will ensure you have the abilities to keep your competitive edge with our point-and-click customization feature.

## Geared Towards Innovation

Our CFI Suite Knoll Connector supports different transaction types, providing you with a hassle-free experience in your business processes:

-  Standard Transactions
-  Drop Shipments
-  Special Orders

CFI Suite leverages SuiteTalk Web Services to ensure its connectors meet Industry Standards. It provides a range of approaches to build reliable and scalable integrations which extend CFI Suite into any business process, while ensuring secure data exchange.

-  Standard-Based Integration
-  Comprehensive Error Handling
-  Industry-Leading Security Model
